TATA CONSULTANCY SERVICES LIMITED
Condensed Standalone Interim Statement of Changes in Equity

Nature and purpose of reserves

a. Capital reserve
The Company recognises profit and loss on purchase, sale, issue or cancellation of the Company's own equity instruments to capital reserve.

b. Capital redemption reserve
As per Companies Act, 2013, capital redemption reserve is created when company purchases its own shares out of free reserves or securities premium. A sum equal to the nominal value of the shares so purchased is transferred to capital redemption reserve. The reserve is utilised in accordance with the provisions of section 69 of the Companies Act, 2013.

c. Special Economic Zone re-investment reserve
The Special Economic Zone (SEZ) re-investment reserve is created out of the profit of eligible SEZ units in terms of the provisions of section 10AA(1)(ii) of the Income-tax Act, 1961. The reserve will be utilised by the Company for acquiring new assets for the purpose of its business as per the terms of section 10AA(2) of Income-tax Act, 1961.

d. Investment revaluation reserve
This reserve represents the cumulative gains and losses arising on the revaluation of equity and debt instruments on the balance sheet date measured at fair value through other comprehensive income. The reserves accumulated will be reclassified to retained earnings and profit and loss respectively, when such instruments are disposed.

e. Cash flow hedging reserve
The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of designated portion of hedging instruments entered into for cash flow hedges. Such gains or losses will be reclassified to statement of profit and loss in the period in which the underlying hedged transaction occurs.

1) Corporate information

Tata Consultancy Services Limited (referred to as “TCS Limited” or “the Company”) provides IT services, consulting and business solutions and has been partnering with many of the world’s largest businesses in their transformation journeys. The Company offers a consulting-led, cognitive powered, integrated portfolio of IT, business and engineering services and solutions. This is delivered through its unique Location-Independent Agile delivery model recognised as a benchmark of excellence in software development.

The Company is a public limited company incorporated and domiciled in India. The address of its corporate office is TCS House, Raveline Street, Fort, Mumbai - 400001. As at September 30, 2020, Tata Sons Private Limited, the holding company owned 72.02% of the Company’s equity share capital.

The Board of Directors approved the condensed standalone interim financial statements for the period ended September 30, 2020 and authorised for issue on October 7, 2020.

2) Statement of compliance

These condensed standalone interim financial statements have been prepared in accordance with the Indian Accounting Standards (referred to as “Ind AS”) 34 Interim Financial Reporting prescribed under section 133 of the Companies Act, 2013 read with Companies (Indian Accounting Standards) Rules as amended from time to time. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Company’s financial position and performance since the last annual financial statements, whenever applicable.

3) Basis of preparation

These condensed standalone interim financial statements have been prepared on historical cost basis, except for certain financial instruments and defined benefit plans which are measured at fair value or amortised cost at the end of each reporting period. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. All assets and liabilities have been classified as current and non-current as per the Company’s normal operating cycle. Based on the nature of services rendered to customers and time elapsed between deployment of resources and the realisation in cash and cash equivalents of the consideration for such services rendered, the Company has considered an operating cycle of 12 months.

The statement of cash flows have been prepared under indirect method.

These condensed standalone interim financial statements have been prepared in Indian Rupee (₹) which is the functional currency of the Company. Foreign currency transactions are recorded at exchange rates prevailing on the date of the transaction. Foreign currency denominated monetary assets and liabilities are retranslated at the exchange rate prevailing on the balance sheet date and exchange gains and losses arising on settlement and restatement are recognised in the statement of profit and loss. Non-monetary assets and liabilities that are measured in terms of historical cost in foreign currencies are not retranslated.

The significant accounting policies used in preparation of the condensed standalone interim financial statements have been discussed in the respective notes.

4) Use of estimates and judgements

The preparation of the condensed standalone interim financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures of contingent liabilities as at the date of the condensed standalone interim financial statements and the reported amounts of income and expense for the periods presented.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected.

The Company uses the following critical accounting estimates in preparation of its condensed standalone interim financial statements:

a. Revenue recognition

- The Company's contracts with customers could include promises to transfer multiple products and services to a customer. The Company assesses the products / services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligation involves judgement to determine the deliverables and the ability of the customer to benefit independently from such deliverables.
- Judgement is also required to determine the transaction price for the contract and to ascribe the transaction price to each distinct performance obligation. The transaction price could be either a fixed amount of customer consideration or variable consideration with elements such as volume discounts, service level credits, performance bonuses, price concessions and incentives. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer. The estimated amount of variable consideration is adjusted in the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and is reassessed at the end of each reporting period. The Company allocates the elements of variable considerations to all the performance obligations of the contract unless there is observable evidence that they pertain to one or more distinct performance obligations.
- The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.
- Revenue for fixed-price contract is recognised using percentage-of-completion method. The Company uses judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.

b. Useful lives of property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

c. Impairment of investments in subsidiaries

The Company reviews its carrying value of investments carried at cost (net of impairment, if any) annually, or more frequently when there is indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for in the statement of profit and loss.

d. Fair value measurement of financial instruments

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

e. Provision for income tax and deferred tax assets

The Company uses estimates and judgements based on the relevant rulings in the areas of allocation of revenue, costs, allowances and disallowances which is exercised while determining the provision for income tax. A deferred tax asset is recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilised. Accordingly, the Company exercises its judgement to reassess the carrying amount of deferred tax assets at the end of each reporting period.

f. Provisions and contingent liabilities

The Company estimates the provisions that have present obligations as a result of past events and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates.

The Company uses significant judgements to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognised nor disclosed in the condensed standalone interim financial statements.

g. Employee benefits

The accounting of employee benefit plans in the nature of defined benefit requires the Company to use assumptions. These assumptions have been explained under employee benefits note.

h. Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Company revises the lease term if there is a change in the non-cancellable period of a lease.

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

Impact of COVID-19

The Company has taken into account the possible impacts of COVID-19 in preparation of the condensed standalone interim financial statements, including but not limited to its assessment of liquidity and going concern assumption, recoverable values of its financial and non-financial assets, impact on revenues and on cost budgets in respect of fixed price contracts, impact on leases and impact on effectiveness of its hedging relationships. The Company has considered internal and certain external sources of information including reliable credit reports, economic forecasts and industry reports upto the date of approval of the condensed standalone interim financial statements and expects to recover the carrying amount of its assets. The impact of COVID-19 on the condensed standalone interim financial statements may differ from that estimated as at the date of approval of these condensed standalone interim financial statements.

5) Financial assets, financial liabilities and equity instruments

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired.

Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets to collect contractual cash flows and the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows on specified dates that are solely payments of principal and interest on the principal amount outstanding and selling financial assets.

The Company has made an irrevocable election to present subsequent changes in the fair value of equity investments not held for trading in other comprehensive income.

Financial assets at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless they are measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in statement of profit and loss.

Investment in subsidiaries

Investment in subsidiaries are measured at cost less impairment loss, if any.

Financial liabilities

Financial liabilities are measured at amortised cost using the effective interest method.

Equity instruments

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received net of direct issue cost.

Derivative accounting

- **Instruments in hedging relationship**

  The Company designates certain foreign exchange forward, currency options and futures contracts as hedge instruments in respect of foreign exchange risks. These hedges are accounted for as cash flow hedges.

  The Company uses hedging instruments that are governed by the policies of the Company which are approved by the Board of Directors. The policies provide written principles on the use of such financial derivatives consistent with the risk management strategy of the Company.

  The hedge instruments are designated and documented as hedges at the inception of the contract. The Company determines the existence of an economic relationship between the hedging instrument and hedged item based on the currency, amount and timing of their respective cash flows. The effectiveness of hedge instruments to reduce the risk associated with the exposure being hedged is assessed and measured at inception and on an ongoing basis. If the hedged future cash flows are no longer expected to occur, then the amounts that have been accumulated in other equity are immediately reclassified in net foreign exchange gains in the statement of profit and loss.

The effective portion of change in the fair value of the designated hedging instrument is recognised in the other comprehensive income and accumulated under the heading cash flow hedging reserve.

The Company separates the intrinsic value and time value of an option and designates as hedging instruments only the change in intrinsic value of the option. The change in fair value of the time value and intrinsic value of an option is recognised in the statement of other comprehensive income and accounted as a separate component of equity. Such amounts are reclassified into the statement of profit and loss when the related hedged items affect profit or loss.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated or no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity till that time remains and is recognised in statement of profit and loss when the forecasted transaction ultimately affects the profit or loss. Any gain or loss is recognised immediately in statement of profit and loss when the hedge becomes ineffective.

- **Instruments not in hedging relationship**

The Company enters into contracts that are effective as hedges from an economic perspective, but they do not qualify for hedge accounting. The change in the fair value of such instrument is recognised in statement of profit and loss.

Impairment of financial assets (other than at fair value)

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. In determining the allowances for doubtful trade receivables, the Company has used a practical expedient by computing the expected credit loss allowance for trade receivables based on a provision matrix. The provision matrix takes into account historical credit loss experience and is adjusted for forward looking information. The expected credit loss allowance is based on the ageing of the receivables that are due and allowance rates used in the provision matrix. For all other financial assets, expected credit losses are measured at an amount equal to the 12-months expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

(a) Investments

Investments consist of the following:

Investments – Non-current

		(₹crore)
	As at September 30, 2020	**As at March 31, 2020**
Investment in subsidiaries		
Fully paid equity shares (unquoted)	2,189	2,189
Investments designated at fair value through OCI		
Fully paid equity shares (unquoted)		
Taj Air Limited	19	19
Less: Impairment in value of investments	(19)	(19)
	2,189	**2,189**

Investments – Current

	(₹crore)	
	As at September 30, 2020	**As at March 31, 2020**
Investments carried at fair value through profit or loss		
Mutual fund units (quoted)	8,602	1,264
Investments carried at fair value through OCI		
Government bonds and securities (quoted)	24,409	24,290
Corporate bonds (quoted)	1,509	132

Total	**-**	**-**	**1**	**31**	**17,103**	**17,135**

The carrying value of financial instruments by categories as at March 31, 2020 is as follows:

(₹crore)

	Fair value through profit or loss	Fair value through other comprehensive income	Derivative instruments in hedging relationship	Derivative instruments not in hedging relationship	Amortised cost	Total carrying value
Financial assets						
Cash and cash equivalents	-	-	-	-	3,852	3,852
Bank deposits	-	-	-	-	787	787
Earmarked balances with banks	-	-	-	-	185	185
Investments (other than in subsidiary)	1,264	24,422	-	-	-	25,686
Trade receivables	-	-	-	-	28,734	28,734
Unbilled receivables	-	-	-	-	5,087	5,087
Loans receivables	-	-	-	-	7,272	7,272
Other financial assets	-	-	146	279	1,647	2,072
Total	**1,264**	**24,422**	**146**	**279**	**47,564**	**73,675**
Financial liabilities						
Trade payables	-	-	-	-	8,734	8,734
Lease liabilities	-	-	-	-	6,110	6,110
Other financial liabilities	-	-	34	659	4,238	4,931
Total	**-**	**-**	**34**	**659**	**19,082**	**19,775**

Carrying amounts of cash and cash equivalents, trade receivables, unbilled receivables, loans receivables and trade payables as at September 30, 2020 and March 31, 2020 approximate the fair value. Difference between carrying amounts and fair values of bank deposits, earmarked balances with banks, other financial assets and other financial liabilities subsequently measured at amortised cost is not significant in each of the periods presented. Fair value measurement of lease liabilities is not required.

(i) Fair value hierarchy:

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

- Level 1 — Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 — Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 — Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

The cost of unquoted investments included in Level 3 of fair value hierarchy approximate their fair value because there is a wide range of possible fair value measurements and the cost represents estimate of fair value within that range.

The following table summarises financial assets and liabilities measured at fair value on a recurring basis and financial assets that are not measured at fair value on a recurring basis (but fair value disclosure are required):

(₹crore)

As at September 30, 2020	Level 1	Level 2	Level 3	Total
Financial assets				
Mutual fund units	8,602	-	-	8,602
Equity shares	-	-	-	-

(j) Derivative financial instruments and hedging activity

The Company's revenue is denominated in various foreign currencies. Given the nature of the business, a large portion of the costs are denominated in Indian Rupee. This exposes the Company to currency fluctuations.

The Board of Directors have constituted a Risk Management Committee (RMC) to frame, implement and monitor the risk management plan of the Company which inter-alia covers risks arising out of exposure to foreign currency fluctuations. Under the guidance and framework provided by the RMC, the Company uses various derivative instruments such as foreign exchange forward, currency options and futures contracts in which the counter party is generally a bank.

The following are outstanding currency options contracts, which have been designated as cash flow hedges:

	As at September 30, 2020			As at March 31, 2020		
Foreign currency	No. of contracts	Notional amount of contracts (In million)	Fair value (₹crore)	No. of contracts	Notional amount of contracts (In million)	Fair value (₹crore)
US Dollar	45	1,150	117	55	1,420	20
Great Britain Pound	74	385	62	71	384	59
Euro	75	392	29	38	363	(31)
Australian Dollar	46	240	12	26	192	48
Canadian Dollar	21	108	9	19	104	16

The movement in cash flow hedging reserve for derivatives designated as cash flow hedges is as follows:

(₹crore)

	Six month period ended September 30, 2020		Year ended March 31, 2020	
	Intrinsic value	Time value	Intrinsic value	Time value
Balance at the beginning of the period	45	(68)	134	(30)
(Gain) / loss transferred to profit and loss on occurrence of forecasted hedge transactions	(124)	270	(449)	513
Deferred tax on (gain) / loss transferred to profit and loss on occurrence of forecasted hedge transactions	26	(70)	54	(38)
Change in the fair value of effective portion of cash flow hedges	183	(214)	355	(565)
Deferred tax on fair value of effective portion of cash flow hedges	(38)	58	(49)	52
Balance at the end of the period	**92**	**(24)**	**45**	**(68)**

The Company has entered into derivative instruments not in hedging relationship by way of foreign exchange forward, currency options and futures contracts. As at September 30, 2020 and March 31, 2020, the notional amount of outstanding contracts aggregated to ₹35,137 crore and ₹40,109 crore, respectively and the respective fair value of these contracts have a net gain of ₹586 crore and net loss of ₹380 crore.

Exchange gain of ₹386 crore and ₹66 crore on foreign exchange forward, currency options and futures contracts that do not qualify for hedge accounting have been recognised in the condensed standalone interim statement of profit and loss for the three month periods ended September 30, 2020 and 2019, respectively.

Exchange gain of ₹372 crore and ₹418 crore on foreign exchange forward, currency options and futures contracts that do not qualify for hedge accounting have been recognised in the condensed standalone interim statement of profit and loss for the six month periods ended September 30, 2020 and 2019, respectively.

Net foreign exchange gains include loss of ₹10 crore and gain of ₹40 crore transferred from cash flow hedging reserve for the three month periods ended September 30, 2020 and 2019, respectively.

Net foreign exchange gains include loss of ₹146 crore and gain of ₹136 crore transferred from cash flow hedging reserve for the six month periods ended September 30, 2020 and 2019, respectively.

Impact of COVID-19

Foreign currency exchange rate risk

The Company basis their assessment believes that the probability of the occurrence of their forecasted transactions is not impacted by COVID-19 pandemic. The Company has also considered the effect of changes, if any, in both counterparty credit risk and own credit risk while assessing hedge effectiveness and measuring hedge ineffectiveness. The Company continues to believe that there is no impact on effectiveness of its hedges.

Other risks

Financial assets carried at fair value as at September 30, 2020 is ₹35,367 crore and financial assets carried at amortised cost as at September 30, 2020 is ₹48,911 crore. A significant part of the financial assets carried at fair values are classified as Level 1 having fair values of ₹34,520 crore as at September 30, 2020. The fair value of these assets is marked to an active market which factors the uncertainties arising out of COVID-19. The financial assets carried at fair value by the Company are mainly investments in liquid debt securities and accordingly, any material volatility is not expected.

Financial assets of ₹5,443 crore as at September 30, 2020 carried at amortised cost is in the form of cash and cash equivalents, bank deposits and earmarked balances with banks where the Company has assessed the counterparty credit risk. Trade receivables of ₹25,080 crore as at September 30, 2020 forms a significant part of the financial assets carried at amortised cost which is valued considering provision for allowance using expected credit loss method. In addition to the historical pattern of credit loss, we have considered the likelihood of delayed payments, increased credit risk and consequential default considering emerging situations while arriving at the carrying value of these assets. This assessment is not based on any mathematical model but an assessment considering the nature of verticals, impact immediately seen in the demand outlook of these verticals and the financial strength of the customers. The Company has specifically evaluated the potential impact with respect to customers in Retail, Travel, Transportation and Hospitality, Manufacturing and Energy verticals having an immediate impact and the rest having an impact with a lag. The Company closely monitors its customers who are going through financial stress and assesses actions such as change in payment terms, discounting of receivables with institutions on no-recourse basis, recognition of revenue on collection basis etc., depending on severity of each case. The collections pattern from the customers in the current period does not indicate stress beyond what has been factored while computing the allowance for expected credit losses. The same assessment is done in respect of unbilled receivables and contract assets of ₹8,060 crore as at September 30, 2020 while arriving at the level of provision that is required. Basis this assessment, the expected credit loss allowance for trade receivables of ₹1,042 crore as at September 30, 2020 is considered adequate.

(k) Equity instruments

The authorised, issued, subscribed and fully paid-up share capital consist of the following:

		(₹crore)
	As at September 30, 2020	**As at March 31, 2020**
Authorised		
460,05,00,000 equity shares of ₹1 each (March 31, 2020: 460,05,00,000 equity shares of ₹1 each)	460	460
105,02,50,000 preference shares of ₹1 each (March 31, 2020: 105,02,50,000 preference shares of ₹1 each)	105	105
	565	**565**
Issued, Subscribed and Fully paid up		
375,23,84,706 equity shares of ₹1 each (March 31, 2020: 375,23,84,706 equity shares of ₹1 each)	375	375
	375	**375**

The Company's objective for capital management is to maximise shareholder value, safeguard business continuity and support the growth of the Company. The Company determines the capital requirement based on annual operating plans and long-term and other strategic investment plans. The funding requirements are met through equity and operating cash flows generated. The Company is not subject to any externally imposed capital requirements.

6) Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract and allocates the consideration in the contract to each lease component on the basis of the relative standalone price of the lease component and the aggregate standalone price of the non-lease components.

The Company recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the statement of profit and loss.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. For leases with reasonably similar characteristics, the Company, on a lease by lease basis, may adopt either the incremental borrowing rate specific to the lease or the incremental borrowing rate for the portfolio as a whole. The lease payments shall include fixed payments, variable lease payments, residual value guarantees, exercise price of a purchase option where the Company is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments. The company recognises the amount of the re-measurement of lease liability due to modification as an adjustment to the right-of-use asset and statement of profit and loss depending upon the nature of modification. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognises any remaining amount of the re-measurement in statement of profit and loss.

The Company has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognised as an expense on a straight-line basis over the lease term.

Company as a lessor

At the inception of the lease the Company classifies each of its leases as either an operating lease or a finance lease. The Company recognises lease payments received under operating leases as income on a straight- line basis over the lease term. In case of a finance lease, finance income is recognised over the lease term based on a pattern reflecting a constant periodic rate of return on the lessor’s net investment in the lease. When the Company is an intermediate lessor it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short term lease to which the Company applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, the Company applies Ind AS 115 Revenue from contracts with customers to allocate the consideration in the contract.

The details of the right-of-use asset held by the Company is as follows:

(₹crore)

	Additions for six month period ended September 30, 2020	Net carrying amount as at September 30, 2020
Leasehold land	-	686
Buildings	318	5,139

	257	**198**	**515**	**402**

Interest on lease liabilities is ₹113 crore and ₹92 crore for the three month periods ended September 30, 2020 and 2019, respectively.

Interest on lease liabilities is ₹230 crore and ₹192 crore for the six month periods ended September 30, 2020 and 2019, respectively.

Impact of COVID-19

The Company does not foresee any large-scale contraction in demand which could result in significant down-sizing of our employee base rendering the physical infrastructure redundant. The leases that the Company has entered with lessors towards properties used as delivery centers / sales offices are long term in nature and no significant changes in the terms of those leases are expected due to the COVID-19.

7) Non-financial assets and non-financial liabilities

(a) Property, plant and equipment

Property, plant and equipment are stated at cost comprising of purchase price and any initial directly attributable cost of bringing the asset to its working condition for its intended use, less accumulated depreciation (other than freehold land) and impairment loss, if any.

Depreciation is provided for property, plant and equipment on a straight line basis so as to expense the cost less residual value over their estimated useful lives based on a technical evaluation. The estimated useful lives and residual value are reviewed at the end of each reporting period, with the effect of any change in estimate accounted for on a prospective basis.

The estimated useful lives are as mentioned below:

Type of asset	Useful lives
Buildings	20 years
Leasehold improvements	Lease term
Plant and equipment	10 years
Computer equipment	4 years
Vehicles	4 years
Office equipment	5 years
Electrical installations	4-10 years
Furniture and fixtures	5 years

Depreciation is not recorded on capital work-in-progress until construction and installation is complete and the asset is ready for its intended use.

Property, plant and equipment with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

TATA CONSULTANCY SERVICES LIMITED
Notes forming part of the Condensed Standalone Interim Financial Statements

Property, plant and equipment consist of the following:

(b) Intangible assets

Intangible assets purchased are measured at cost as of the date of acquisition, as applicable, less accumulated amortisation and accumulated impairment, if any.

Intangible assets consist of rights under licensing agreement and software licences which are amortised over licence period which equates the economic useful life ranging between 2-5 years on a straight line basis over the period of its economic useful life.

Intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

Intangible assets consist of the following:

	(₹ crore)
	Rights under licensing agreement and software licences

	7,303	**6,538**
Advance to related parties, considered good comprise:		
The Titan Company Limited	1	3
Tata AIA Life Insurance Company Limited	1	1
Tata Sons Private Limited	7	7

Non-current - Others includes advance of ₹271 crore and ₹271 crore towards acquiring right-of-use of leasehold land as at September 30, 2020 and March 31, 2020, respectively.

(d) Inventories

Inventories consists of a) Raw materials, sub-assemblies and components, b) Work-in-progress, c) Stores and spare parts and d) Finished goods. Inventories are carried at lower of cost and net realisable value. The cost of raw materials, sub-assemblies and components is determined on a weighted average basis. Cost of finished goods produced or purchased by the Company includes direct material and labour cost and a proportion of manufacturing overheads.

Inventories consist of the following:

		(₹crore)
	As at September 30, 2020	As at March 31, 2020
Raw materials, sub-assemblies and components	5	5
Finished goods and work-in-progress*	-	-

*Represents value less than ₹0.50 crore.

(e) Other liabilities

Other liabilities consist of the following:

Other liabilities – Current

		(₹ crore)
	As at September 30, 2020	As at March 31, 2020
Advance received from customers	155	226
Indirect taxes payable and other statutory liabilities	2,770	1,762
Operating lease liabilities	-	2
Others	51	58
	2,976	2,048

(f) Provisions

Provisions consist of the following:

Provisions – Current

		(₹crore)
	As at September 30, 2020	As at March 31, 2020
Provision towards legal claim (Refer note 16)	1,218	-
Provision for foreseeable loss	105	199
Other provisions	36	36
	1,359	235

8) Revenue recognition

The Company earns revenue primarily from providing IT services, consulting and business solutions. The Company offers a consulting-led, cognitive powered, integrated portfolio of IT, business and engineering services and solutions.

Revenue is recognised upon transfer of control of promised products or services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those products or services.

- Revenue from time and material and job contracts is recognised on output basis measured by units delivered, efforts expended, number of transactions processed, etc.

- Revenue related to fixed price maintenance and support services contracts where the Company is standing ready to provide services is recognised based on time elapsed mode and revenue is straight lined over the period of performance.
- In respect of other fixed-price contracts, revenue is recognised using percentage-of-completion method ('POC method') of accounting with contract costs incurred determining the degree of completion of the performance obligation. The contract costs used in computing the revenues include cost of fulfilling warranty obligations.
- Revenue from the sale of distinct internally developed software and manufactured systems and third party software is recognised upfront at the point in time when the system / software is delivered to the customer. In cases where implementation and / or customisation services rendered significantly modifies or customises the software, these services and software are accounted for as a single performance obligation and revenue is recognised over time on a POC method.
- Revenue from the sale of distinct third party hardware is recognised at the point in time when control is transferred to the customer.
- The solutions offered by the Company may include supply of third-party equipment or software. In such cases, revenue for supply of such third party products are recorded at gross or net basis depending on whether the Company is acting as the principal or as an agent of the customer. The Company recognises revenue in the gross amount of consideration when it is acting as a principal and at net amount of consideration when it is acting as an agent.

Revenue is measured based on the transaction price, which is the consideration, adjusted for volume discounts, service level credits, performance bonuses, price concessions and incentives, if any, as specified in the contract with the customer. Revenue also excludes taxes collected from customers.

Revenue from subsidiaries is recognised based on transaction price which is at arm's length.

Contract fulfilment costs are generally expensed as incurred except for certain software licence costs which meet the criteria for capitalisation. Such costs are amortised over the contractual period or useful life of licence whichever is less. The assessment of this criteria requires the application of judgement, in particular when considering if costs generate or enhance resources to be used to satisfy future performance obligations and whether costs are expected to be recovered.

Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled receivables (only act of invoicing is pending) when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

Unearned and deferred revenue ("contract liability") is recognised when there is billings in excess of revenues.

The billing schedules agreed with customers include periodic performance based payments and / or milestone based progress payments. Invoices are payable within contractually agreed credit period.

In accordance with Ind AS 37, the Company recognises an onerous contract provision when the unavoidable costs of meeting the obligations under a contract exceed the economic benefits to be received.

Contracts are subject to modification to account for changes in contract specification and requirements. The Company reviews modification to contract in conjunction with the original contract, basis which the transaction price could be allocated to a new performance obligation, or transaction price of an existing obligation could undergo a change. In the event transaction price is revised for existing obligation, a cumulative adjustment is accounted for.

The Company disaggregates revenue from contracts with customers by nature of services, industry verticals and geography.

Revenue disaggregation by nature of services is as follows:

(₹ crore)

	Three month period ended September 30, 2020	Three month period ended September 30, 2019	Six month period ended September 30, 2020	Six month period ended September 30, 2019
Consultancy services	33,110	31,969	64,415	64,098
Sale of equipment and software licences	255	418	574	946
	33,365	**32,387**	**64,989**	**65,044**

Revenue disaggregation by industry vertical is as follows:

(₹crore)

	Three month period ended September 30, 2020	Three month period ended September 30, 2019	Six month period ended September 30, 2020	Six month period ended September 30, 2019
Banking, Financial Services and Insurance	12,735	12,090	24,725	23,924
Manufacturing	2,801	2,983	5,594	5,957

Others	3,145	2,928	6,019	5,829
	33,365	**32,387**	**64,989**	**65,044**

Geographical revenue is allocated based on the location of the customers.

Impact of COVID-19

While the Company believes strongly that it has a rich portfolio of services to partner with customers, the impact on future revenue streams could come from the inability of our customers to continue their businesses due to financial resource constraints or their services no-longer being availed by their customers. The Company has assessed that customers in Retail, Travel, Transportation and Hospitality, Energy and Manufacturing verticals are more prone to immediate impact due to disruption in supply chain and drop in demand while customers in Banking, Financial Services to have a lag impact due to dependence of revenues from the impacted verticals. The financial performance in the current quarter reflects the impact on revenues from affected sectors and the Company has considered such impact to the extent known and available currently. While entities are re-calibrating their approach to deal with the economic impact of the pandemic in their operations, the assessment of impact on future revenues is a continuing process given the uncertainties associated with its nature and duration.

The supply side disruptions due to ongoing pandemic, which could result in having impact on future cost budgets or delays in meeting contractual commitments have largely been taken care of by deploying SBWS™, approvals from the customer to render services through SBWS™. The Company has taken steps to assess the cost budgets required to complete its performance obligations in respect of fixed price projects and incorporated the impact of likely delays / increased costs in meetings its obligations. Such impact could be in the form of provision for onerous contracts or re-setting of revenue recognition in fixed price contract where revenue is recognised on percentage-of-completion basis. The Company has also assessed the impact of delays and inability to meet contractual commitments and has taken actions such as engaging with the customer to agree on revised SLAs in light of current crisis, invoking of force-majeure clause etc. to ensure that revenue recognition in such cases reflect realisable revenues.

9) Other Income

Dividend income is recorded when the right to receive payment is established. Interest income is recognised using the effective interest method.

Other income consist of the following:

(₹crore)

	Three month period ended September 30, 2020	Three month period ended September 30, 2019	Six month period ended September 30, 2020	Six month period ended September 30, 2019
Interest income	629	802	1,214	1,759

Other interest (including interest on tax refunds)	-	1	-	197
Dividend income comprise:				
Dividends from subsidiaries	787	1,375	861	2,119

10) Employee benefits

Defined benefit plans

For defined benefit plans, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling and the return on plan assets (excluding interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Past service cost, both vested and unvested, is recognised as an expense at the earlier of (a) when the plan amendment or curtailment occurs; and (b) when the entity recognises related restructuring costs or termination benefits.

The retirement benefit obligations recognised in the balance sheet represents the present value of the defined benefit obligations reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

The Company provides benefits such as gratuity, pension and provident fund (Company managed fund) to its employees, which are treated as defined benefit plans.

Defined contribution plans

Contributions to defined contribution plans are recognised as expense when employees have rendered services entitling them to such benefits.

The Company provides benefits such as superannuation and foreign defined contribution plans to its employees which are treated as defined contribution plans.

Short-term employee benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages etc. and the expected cost of ex-gratia are recognised in the period in which the employee renders the related service. A liability is recognised for the amount expected to be paid when there is a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Compensated absences

Compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as undiscounted liability at the balance sheet date. Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

Employee benefit expenses consist of the following:

(₹crore)

	Three month period ended September 30, 2020	Three month period ended September 30, 2019	Six month period ended September 30, 2020	Six month period ended September 30, 2019

Other employee benefit obligations	33	23
	2,432	**2,057**

11) Cost recognition

Costs and expenses are recognised when incurred and have been classified according to their nature.

The costs of the Company are broadly categorised in employee benefit expenses, cost of equipment and software licences, depreciation and amortisation expense and other expenses. Other expenses mainly include fees to external consultants, facility expenses, travel expenses, communication expenses, bad debts and advances written off, allowance for doubtful trade receivable and advances (net) and other expenses. Other expenses is an aggregation of costs which are individually not material such as commission and brokerage, recruitment and training, entertainment, etc.

(a) Cost of equipment and software licences

Cost of equipment and software licences consist of the following:

(₹crore)

	Three month period ended September 30, 2020	Three month period ended September 30, 2019	Six month period ended September 30, 2020	Six month period ended September 30, 2019

Opening stock	-	-	-	-
Less: Closing stock*	-	-	-	-
	-	-	-	-
	224	**380**	**508**	**855**

*Represents value less than ₹0.50 crore.

(b) Other expenses

Other expenses consist of the following:

(₹crore)

	Three month period ended September 30, 2020	Three month period ended September 30, 2019	Six month period ended September 30, 2020	Six month period ended September 30, 2019
Fees to external consultants	3,404	3,515	6,791	6,920
Facility expenses	394	558	813	1,101
Travel expenses	238	628	484	1,359
Communication expenses	314	255	630	495
Bad debts and advances written off, allowance for doubtful trade receivables and advances (net)	69	37	117	86
Other expenses	1,425	1,813	3,118	3,643
	5,844	**6,806**	**11,953**	**13,604**

Other expenses include ₹647 crore and ₹906 crore for the three month periods ended September 30, 2020 and 2019, respectively, towards sales, marketing and advertisement expenses.

Other expenses include ₹1,365 crore and ₹1,807 crore for the six month periods ended September 30, 2020 and 2019, respectively, towards sales, marketing and advertisement expenses.

12) Finance costs

Finance costs consist of the following:

(₹crore)

	Three month period ended September 30, 2020	Three month period ended September 30, 2019	Six month period ended September 30, 2020	Six month period ended September 30, 2019
Interest on lease liabilities	113	92	230	192
Interest on tax matters	35	6	36	138
Other interest costs	1	1	1	2
	149	**99**	**267**	**332**

13) Income taxes

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred taxes are recognised in statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity, respectively.

Current income taxes

The current income tax expense includes income taxes payable by the Company and its branches in India and overseas. The current tax payable by the Company in India is Indian income tax payable on worldwide income after taking credit for tax relief available for export operations in Special Economic Zones (SEZs).

Current income tax payable by overseas branches of the Company is computed in accordance with the tax laws applicable in the jurisdiction in which the respective branch operates. The taxes paid are generally available for set off against the Indian income tax liability of the Company's worldwide income.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction and where the relevant tax paying unit intends to settle the asset and liability on a net basis.

Deferred income taxes

Deferred income tax is recognised using the balance sheet approach. Deferred income tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount, except when the deferred income tax arises from the initial recognition of an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction.

Deferred income tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be received or settled.

For operations carried out in SEZs, deferred tax assets or liabilities, if any, have been established for the tax consequences of those temporary differences between the carrying values of assets and liabilities and their respective tax bases that reverse after the tax holiday ends.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Deferred tax assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, to the extent it would be available for set off against future current income tax liability. Accordingly, MAT is recognised as deferred tax asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realised.

Direct tax contingencies

The Company has ongoing disputes with income tax authorities relating to tax treatment of certain items. The disputes relate to tax treatment of certain expenses claimed as deductions, computation or eligibility of tax incentives or allowances, and characterisation of fees for services received. The Company has contingent liability in respect of demands from direct tax authorities in India and other jurisdictions, which are being contested by the Company on appeal amounting ₹1,453 crore and ₹1,453 crore as at September 30, 2020 and March 31, 2020 respectively. In respect of tax contingencies of ₹318 crore and ₹318 crore as at September 30, 2020 and March 31, 2020, respectively, not included above, the Company is entitled to an indemnification from the seller of TCS e-Serve Limited.

The Company periodically receives notices and inquiries from income tax authorities related to the Company's operations in the jurisdictions it operates in. The Company has evaluated these notices and inquiries and has concluded that any consequent income tax claims or demands by the income tax authorities will not succeed on ultimate resolution.

14) Earnings per share

Basic earnings per share is computed by dividing profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. The Company did not have any potentially dilutive securities in any of the periods presented.

	Three month period ended September 30, 2020	Three month period ended September 30, 2019	Six month period ended September 30, 2020	Six month period ended September 30, 2019
Profit for the period (₹crore)	7,448	8,636	13,544	17,351
Weighted average number of equity shares	375,23,84,706	375,23,84,706	375,23,84,706	375,23,84,706
Basic and diluted earnings per share (₹)	19.85	23.02	36.09	46.24
Face value per equity share (₹)	1	1	1	1

15) Segment information

The Company publishes the condensed standalone interim financial statements of the Company along with the condensed consolidated interim financial statements. In accordance with Ind AS 108, Operating Segments, the Company has disclosed the segment information in the condensed consolidated interim financial statements.

16) Commitments and Contingencies

Capital commitments

The Company has contractually committed (net of advances) ₹1,111 crore and ₹1,272 crore as at September 30, 2020 and March 31, 2020, respectively, for purchase of property, plant and equipment.

Contingencies

- **Direct tax matters**

  Refer note 13.

- **Indirect tax matters**

  The Company has ongoing disputes with tax authorities mainly relating to treatment of characterisation and classification of certain items. The Company has demands amounting to ₹466 crore and ₹464 crore as at September 30, 2020 and March 31, 2020, respectively from various indirect tax authorities which are being contested by the Company based on the management evaluation and on the advice of tax consultants.

- **Other claims**

  Claims aggregating ₹112 crore and ₹133 crore as at September 30, 2020 and March 31, 2020, respectively, against the Company have not been acknowledged as debts.

  In addition to above, in October 2014, Epic Systems Corporation (referred to as Epic) filed a legal claim against the Company in the Court of Western District Madison, Wisconsin alleging unauthorised access to and download of their confidential information and use thereof in the development of the Company's product MedMantra. In April 2016, the Company received an unfavourable jury verdict awarding damages of ₹6,937 crore (US $940 million) to Epic which was thereafter reduced by the Trial Court to ₹3,100 crore (US $420 million). Pursuant to reaffirmation of the District Court order in March 2019, the Company filed an appeal in the Appeals Court to fully set aside the Order. Epic also filed a cross appeal challenging the reduction by the District Court judge of ₹738 crore (US $100 million) award and ₹1,476 crore (US $200 million) in punitive damages. On August 20, 2020, the Appeals Court vacated the award of ₹2,066 crore (US $280 million) in punitive damages considering the award to be constitutionally excessive and remanded the case back to District Court with instructions to reassess and reduce the punitive damages award to at most ₹1,033 crore (US $140 million), affirmed the District Court's decision vacating the jury's award of ₹738 crore (US $100 million) in compensatory damages for alleged use of "other confidential information" by the Company, and affirmed the District Court's decision upholding the jury's award of ₹1,033 crore (US $140 million) in compensatory damages for use of the comparative analysis by the Company. The Company has received legal advice to the effect that the Appeals Court has misapprehended the facts of the case while delivering its judgement and that the Company has correct and the strongest possible arguments in its petition filed at the Appeals Court on September 3, 2020, for re-hearing of the awards for both compensatory and punitive damages, which is currently pending. Epic has also filed for re-hearing that portion of the Appeals Court's decision that invalidated award of punitive damages. However, considering all the facts and various legal precedence, on a conservative and prudent basis, the Company has provided ₹1,218 crore (US $165 million) towards this legal claim in its financial statements for the period ended September 30, 2020. This has been presented as an "exceptional item" in the condensed standalone interim statement of profit and loss.

Pursuant to US Court procedures, a Letter of Credit has been made available to Epic for ₹3,247 crore (US $440 million) as financial security in order to stay execution of the judgment pending post-appeal proceedings and conclusion.

- **Bank guarantees and letter of comfort**

  The Company has given letter of comfort to banks for credit facilities availed by its subsidiaries. As per the terms of letter of comfort, the Company undertakes not to divest its ownership interest directly or indirectly in the subsidiary and provide such managerial, technical and financial assistance to ensure continued successful operations of the subsidiary.

  The Company has provided guarantees to third parties on behalf of its subsidiaries. The Company does not expect any outflow of resources in respect of the above.

The amounts assessed as contingent liability do not include interest that could be claimed by counter parties.

17) The Indian Parliament has approved the Code on Social Security, 2020 which would impact the contributions by the company towards Provident Fund and Gratuity. The effective date from which the changes are applicable is yet to be notified and the rules for quantifying the financial impact are yet to be framed. Based on an initial assessment by the Company, the additional impact on Provident Fund contributions by the Company is not expected to be material, whereas, the likely additional impact on Gratuity liability / contributions by the Company could be material. The Company will complete its evaluation and will give appropriate impact in its financial statements in the period in which, the Code becomes effective and the related rules to determine the financial impact are published.

18) Related party transactions

The Company paid an amount of ₹1,621 crore to Tata Sons Private Limited, the holding company, towards final dividend for the year ended March 31, 2020, as approved by the shareholders in the Annual General Meeting. Additionally, the Company also paid an amount of ₹1,351 crore towards interim dividend as approved by the Board of Directors at its meeting.

Other than above, the Company's material related party transactions during the period and outstanding balances as on date are with its subsidiaries with whom the Company routinely enters into transactions in the ordinary course of business.

19) Subsequent events

(a) The Board of Directors at its meeting held on October 7, 2020, has declared an interim dividend of ₹12 per equity share.

(b) The Board of Directors at its meeting held on October 7, 2020, has approved a proposal to buy-back upto 5,33,33,333 equity shares of the Company for an aggregate amount not exceeding ₹16,000 crore being 1.42% of the total paid up equity share capital at ₹3,000 per equity share subject to approval from shareholders.
